

Fatigue Of Materials And Structures: Application To Damage And Design, Volume 2

This paper discusses briefly several aspects related to fatigue and damage tolerance of hybrid materials Fatigue of Structures and Materials, Hybrid Materials

http://link.springer.com/chapter/10.1007%2F978-90-481-2746-7_70

In materials science, fatigue is the weakening of a material caused by repeatedly applied loads. It is the progressive and localized structural damage that occurs

[http://en.wikipedia.org/wiki/Fatigue_\(material\)](http://en.wikipedia.org/wiki/Fatigue_(material))

Within the framework of this research the material fatigue damage of a forging die due materials & structures, investigations on the fatigue failure of
